

MARVIN JOHNSON III

APPLIED AI & SYSTEMS BUILDER

marvin.r.johnson89@gmail.com | github.com/treyj333 | linkedin.com/in/marvin-johnson-89ba82210 | Taylors, SC

> SUMMARY

I build offline-capable, real-world AI systems for environments where reliability, privacy, and efficiency matter more than buzzwords. My work sits at the intersection of applied AI, edge computer vision, wireless systems, and automation. From autonomous booking systems to edge AI on Raspberry Pi, I build deployed tools that solve real problems for real businesses.

> SKILLS & TOOLS

Python | Kotlin | JavaScript | TypeScript | React | Node.js | Express | SQLite
Claude API | Gemini | Ollama | llama.cpp | Pinecone | n8n | Playwright
Raspberry Pi | ESP32 | LoRa Mesh | OpenCV | Edge AI | Computer Vision
Android / Jetpack Compose | Process Optimization | Wireless Automation

> EXPERIENCE

M&M Services and Solutions LLC Jan 2023 - Present
Founder / Applied AI / Systems Builder
Design and deploy applied AI, edge computer vision, and wireless automation systems. Reduce operational inefficiencies through offline-capable architectures.

AirsoftX Jan 2025 - Present
Founder
Built booking and event systems that scaled participation at the 4th largest paintball and airsoft facility in the world. System now operates autonomously.

Atalva Mar 2023 - Jan 2026
Co-Founder / Product Design
Developed and commercialized a patent-pending training device. Secured contracts with the South Carolina Department of Education.

The Mailroom Barber Co Aug 2021 - Nov 2024
Marketing / Operations Lead
Drove substantial revenue growth through automation, digital systems, and operational optimization.

The Brand Mule Feb 2021 - Oct 2024
Web Designer

US Army Jun 2018 - Jun 2021
Joint Fire Support Specialist & Operations Manager
Military service at Fort Bragg (now Fort Liberty), Fayetteville, NC.

> SELECTED PROJECTS

PROJECT SOL - Multi-backend conversational AI with persistent memory and mood detection
Ideas Guy - AI business plan generator with interactive financial dashboards
AirsoftX Bookings - Autonomous booking system for major airsoft facility
TacThrift OfflineLLM - Fully offline Android RAG chat app with on-device inference
Booking Bot - AI agent that books appointments through visual screen interaction
Dither Camera - Floyd-Steinberg dithering applied to live camera feeds
Recon Scanner - Android WiFi/Bluetooth/BLE reconnaissance scanner
ChairFlow - AI client retention tool for service providers

> CERTIFICATIONS & PATENT

MIT Professional Education - No Code and Agentic AI
Patent Pending - MANNEQUIN HEAD HOLDER (training device, Atalva)
